

Employee Opinion Surveys

Annually, ASC conducts an Employee Opinion Survey at each of our facilities. All teams are asked to participate and answer a variety of questions.

Because we use this information to improve all aspects of ASC, it's important we receive a high response rate in a timely manner. This year marked an excellent 76% average rate of responses. A high response rate increases the validity of the score and better represents the collective voice of our team members.

We would like to recognize the top five facilities based on those that met their expected response rate and the highest average comprehensive scores.

The overall winner was **Countryside Meadows**. They have received a plaque and a trophy commemorating their wonderful service and dedication.

The remaining winners will each be receiving a plaque for their buildings, and they are as follows:

- 2nd place - **Hillcrest Village**
- 3rd place - **Springhill Village**
- 4th place - **North Park Nursing Center**
- 5th place - **Lake Pointe Village**

No matter what placing these centers ranked at, we are grateful for their hard work and dedication. Please help us in congratulating the following communities for their commitment to ASC.
